PART I –FINANCIAL INFORMATION

Item 1. Financial Statements

The interim Consolidated Financial Statements of Megawide Construction Corporation ("Megawide") as of June 30, 2023 with comparative figures as of December 31, 2022 and June 30, 2022, Cash Flows and Schedule of Aging Accounts Receivable is incorporated by reference as Exhibit 1.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

A. RESULTS OF OPERATIONS

Review of results for the six (6) months ended June 30, 2023 as compared with the results for the six (6) months ended June 30, 2022. The net income related to the disposal group is presented separately in the Results of Discontinued Operations.

Results of Continuing Operations

Revenues increased by 52% or P3.8 billion

Consolidated revenues for the period amounted to P11.2 billion, 52% or P3.8 billion higher than the same period last year.

Construction revenues amounted to P11.0 billion and contributed 98% to the consolidated revenues. The construction segment has maintained its momentum in delivering projects on time at the start of the year. With a healthy orderbook, the Company is in the position to work on its order book, which are expected to be completed within two to three years, from various projects such as Suntrust Home Developers' Suncity West Side City project, 8990 Holdings, Inc.'s Urban Deca Ortigas and Cubao, Megaworld's Gentry Manor, and the DOTr's Malolos Clark Railway Phase 1 Project – a joint venture project with Hyundai Engineering & Construction Co., Ltd., and Dong-ah Geological Engineering Company Ltd.

Landport operations meanwhile delivered revenue of P191.0 million from office towers and commercial spaces and contributed 2% to the total consolidated revenues. Occupancy rates continue to be depressed due to the oversupply in the market, resulting in lower lease income compared to the first quarter of 2022. The Company, however, is confident that it will be able to lease out the spaces gradually during the course of the year as the environment continues to improve and the Team extensively explores alternative schemes. Amid this predicament, PITX continued to serve as a transportation convergence point to serve commuters to and from different places of work, resulting in high passenger throughput.

Direct Costs increased by 59% or P3.6 billion
Direct costs amounted to P9.8 billion and were higher by 59% or P3.6 billion. The movement was mainly related to rising prices of raw materials, services and higher labor costs, along with higher fixed-costs and depreciation expenses associated with capacity building.

Gross Profit increased by 19% or P218.0 million
Consolidated gross profit amounted to P1.4 billion in 2023, translating to a consolidated gross profit margin of 12%. The construction business contributed P1.4 billion or 98% of the Group's gross profit. Terminal operations, on the other hand, contributed P20.9 million or 2% of the Group's gross profit.

Other Operating Expenses increased by 61% or P269.6 million
Other Operating Expenses for the six-month period amounted to P716.6 million. The increase of P274.6 million is mainly due to increase in fixed costs in support of the Company growth plans for various infrastructure and development projects that it will be undertaking such as the execution of CP104 of the Metro Manila Subway System Project worth P18 billion. The contract was awarded to the Company, together with its Japanese consortium partners, in May 2022. Other businesses under development are the different locations for its transit-centric development (TCDs) expansion.

Finance Costs increased by 59% or P386.7 million
Finance costs amounted to P1.0 billion, higher by P386.7 million year-on-year. In August 2022, the Company raised a total of P4 billion from its maiden bonds with Series A interest rate of 6.9506% and Series B interest rate of 7.9663%. In addition, the Group made additional borrowings amounted to P1.3 billion which increases the interest expenses by P386.7 million during the period.

Finance Income increased by 171% or P381 million
Finance income amounted to P605.1 million, with the increase of P232 million coming mainly from interest income from money market placements as a result of higher cash balance compared with June 2022.

Others - net increased by 10% or P14 million
Others – net generated an income of P155.7 million and increased by P14 million, attributable to incremental CUSA charges and utility recoveries.

Tax Expense decreased by P57.6 million or 77%
Total tax expense decreased due to the lower taxable income for the period.

Net Loss From Discontinued Operations decrease by 100% or P789 million
In 2023, operations from airport business and its ancillary, airport merchandising, where no longer being consolidated by the Group after the sale of its 33 & 1/3% share in September 2022. The Company, however, continues to own 33 & 1/3% plus 1 share of GMCAC.

Consolidated Net Income increased by 182% or P803.8 million
Consolidated net income amounted to P362.6 million compared to consolidated net loss of P441.1 million in 2022. The improvement in net income is a result of improved construction net income and deconsolidation of the airport segment.

1.3 Continuing Impact of COVID-19 on the Group's Business

The COVID-19 pandemic started to become widespread in the Philippines in early March 2020 and its impact has been continuing until the date of the approval of these consolidated financial statements. In 2022 and 2023, the country's economic status improved because of reopening of local and international travels and loosening of health and safety protocols and restrictions. Demand and supply of products are slowly returning to pre-pandemic levels.

As a result, overall continuing impact of the COVID-19 pandemic to the Group is continuously improving and Group's operations is slowly going back to its pre-pandemic levels. Management will continue to take actions to continually improve the operations as the need arises. Based on the foregoing improvements, management projects that the Group would continue to report positive results of operations and would remain liquid to meet current obligations as they fall due. Accordingly, management has not determined material uncertainty that may cast significant doubt on the Group's ability to continue as a going concern due to the effects of the pandemic.

The interim condensed consolidated financial statements of the Group as of and for the six months ended June 30, 2023 (including the consolidated financial statements as of

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The interim condensed consolidated financial statements have been prepared in accordance with the accounting policies adopted by the Group in its recent annual consolidated financial statements for the year ended December 31, 2022.

These policies have been consistently applied to all the years presented, unless otherwise stated.

2.1 Basis of Preparation of Interim Condensed Consolidated Financial Statements

(a) Statement of Compliance with Philippine Financial Reporting Standards

The interim condensed consolidated financial statements of the Group have been prepared in accordance with Philippine Accounting Standard (PAS) 34, *Interim Financial Reporting*. They do not include all of the information and disclosures required in the annual consolidated financial statements and should be read in conjunction with the audited consolidated financial statements of the Group as at and for the year ended December 31, 2022.

The preparation of interim condensed consolidated financial statements in accordance with PFRS requires management to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses. Although these estimates are based on management's best knowledge of current events and actions, actual results may ultimately differ from those estimates. There were no changes in estimates of amounts reported in prior financial years that have material effect in the current interim period.

(b) Presentation of Interim Condensed Consolidated Financial Statements

The interim condensed consolidated financial statements are presented in accordance with PAS 1, *Presentation of Financial Statements*. The Group opted to present a separate interim condensed consolidated statement of income and interim condensed consolidated statement of comprehensive income.

The Group presents a third consolidated statement of financial position as at the beginning of the preceding period when it applies an accounting policy retrospectively, or makes a retrospective restatement or reclassification of items that has a material effect on the information in the consolidated statement of financial position at the beginning of the preceding period. The related notes to the third consolidated statement of financial position are not required to be disclosed.

(c) Functional and Presentation Currency

These interim condensed consolidated financial statements are presented in Philippine pesos, the Group's functional and presentation currency, and all values represent absolute amounts except when otherwise indicated.

Items included in the interim condensed consolidated financial statements are measured using its functional currency. Functional currency is the currency of the primary economic environment in which the Group operates.

(a) Effective in 2023 that are Relevant to the Group

The Group adopted for the first time the following amendments and annual improvements to PFRS, which are mandatorily effective for annual periods beginning on or after January 1, 2023:

PAS 1 (Amendments)	:	Presentation of Financial Statements – Classification of Liabilities as Current or Noncurrent
PAS 1 (Amendments)	:	Presentation of Financial Statements – Disclosure of Accounting Policies
PAS 8 (Amendments)	:	Accounting Estimates – Definition of Accounting Estimates
PAS 12 (Amendments)	:	Income Taxes – Deferred Tax Related to Assets and Liabilities Arising from a Single Transaction

Discussed below are the relevant information about these pronouncements.

(i) PAS 1 (Amendments) *Presentation of Financial Statements – Classification of Liabilities as Current or Noncurrent*. The amendments aim to promote consistency in applying the requirements by helping companies determine whether, in the statement of financial position, debt and other liabilities with an uncertain settlement date should be classified as current (due or potentially due to be settled within one year) or non-current.

(ii) PAS 1 (Amendments), *Presentation of Financial Statements – Disclosure of Accounting Policies*. The amendments replaced the requirement for entities to disclose their significant accounting policies with the requirement to disclose their material accounting policy information. The amendments also include guidance to help entities apply the definition of material in making decisions about accounting policy disclosures.

(iii) PAS 8 (Amendments), *Accounting Estimates – Definition of Accounting Estimates.* The amendments introduced the definition of accounting estimates and included other amendments to help entities distinguish changes in accounting estimates from changes in accounting policies.

(iv) PAS 12 (Amendments), *Income Taxes – Deferred Tax Related to Assets and Liabilities Arising from a Single Transaction.* The amendments narrowed the scope of the recognition exemption in paragraphs 15 and 24 of PAS 12 so that it no longer applies to transactions that, on initial recognition, give rise to equal taxable and deductible temporary differences. The amendments apply to transactions such as leases and decommissioning obligations.

(b) Effective Subsequent to 2023 but not Adopted Early

There are amendments to existing standards effective for annual periods subsequent to 2023, which are adopted by the FRSC. Management will adopt the relevant pronouncements in accordance with their transitional provisions; and, unless otherwise stated, none of these are expected to have significant impact on the Group's interim condensed consolidated financial statements:

(i) PFRS 10 (Amendments), *Consolidated Financial Statements*, and PAS 28 (Amendments), *Investments in Associates and Joint Ventures – Sale or Contribution of Assets Between an Investor and its Associates or Joint Venture* (effective date deferred indefinitely)

Impairment loss for the year	**-**	799,248,742

Contract assets pertains to the gross amount due from customers for contract works of all contracts in progress which are not yet billed. Contract assets in 2023 and 2022 also include the cost of the landport area of the PITX Project amounting to P635.8 million and P597.5 million, respectively which is to be recovered through the Grantor payments.

The Group satisfies its performance obligation when the full completion of the project and benefit therefrom can be derived by the customers. Invoices are due once related accomplishments for the month are complete.

The Group recognizes contract assets, due to timing difference of billings and satisfaction of performance obligation, to the extent of satisfied performance obligation on all open contracts as of the end of the reporting period. Changes in the contract assets are recognized by the Group when a right to receive payment is already established.

In 2022, the Group wrote-off certain contract assets amounting to P908.4 million related to costs incurred on three big projects that management decided to discontinue due to irreconcilable claims and lack of reasonable expectation that such costs will be recovered. The onset of COVID suspended non-essential construction activities and affected a number of projects in the Group's order book. To maintain strong business relationships, the Group constantly reached out and negotiated with these three customers as early as late 2020, when the impact of COVID through higher input costs and delayed supply chain affected the pricing and performance for these projects. While the Group continued to hold several discussion and negotiations in 2021 and 2022, it became apparent to management in 2022 that the presented claims from these projects can no longer be collected and decided that progress on the remaining works can no longer be continued to manage the financial impact to the Group. The Group, however, is of the opinion that it has complied with all the provisions of the contracts and, after exhausting all means available, has sufficient grounds to terminate the contracts.

In addition to the contract assets which was written off, the Group also provided an additional allowance for impairment for certain projects which have doubtful recoverability. The impairment losses is presented as part of Impairment losses on receivables and contract assets under Income and Expenses section in the 2022 consolidated statement of income.

9.1 Advances to Contractors and Suppliers

Current portion of advances to contractors and suppliers pertain to down payments made by the Group based on a certain percentage of the contract price. The initial payment will eventually be recouped or deducted from the amount payable by the Group either in a pro-rata basis or in full once billed by the contractors and supplier. These advances are classified as current since it would be applied as payments to the subcontractors for the Group's construction operations. This also includes materials and supplies provided by the Group to subcontractors which will be deducted from the progress billings of the subcontractors upon installation. The risk of loss on these materials and supplies are borne by the subcontractors.

The impairment of the current portion of advances to contractors and suppliers was assessed by determining the financial position of the contractors and suppliers and their capability to comply the agreed performance obligation. Despite the impact of COVID-19 pandemic, the Group assessed that the advances could be recouped from the contractors and suppliers through the work rendered and offsetting any unrecouped portion against the outstanding liability to the contractors and suppliers from another project or within the Group.

On the other hand, non-current portion of these advances relate to the down payments made by the Group for the construction of airport terminal building and acquisitions of property, plant and equipment.

The related input VAT on purchase of capital goods exceeding P1.0 million shall be allowed as credit against output tax outright pursuant to Republic Act (R.A.) No. 10963, known as the *Tax Reform for Acceleration and Inclusion (TRAIN) Law*.

Non-current portion of deferred input VAT represents GMCAC's deferred input VAT arising mainly from the acquisition of goods and equipment and payment of services in relation to the construction activities in the airport. In 2022, as a result of the sale and deconsolidation of GMCAC, the deferred input VAT relating to GMCAC was derecognized from the Group's consolidated statement of financial position.

Leases are either non-cancellable or may only be cancelled by incurring a substantive termination fee. Some leases contain an option to purchase the underlying lease asset outright at the end of the lease, or to extend the lease for a further term. The Group is prohibited from selling or pledging the underlying leased assets as security. For leases over warehouses and offices, the Group must keep those properties in a good state of repair and return the properties in their original condition at the end of the lease.

18. REVENUES

When the Group prepares its investor presentations and when the Group's Executive Committee evaluates the financial performance of the operating segments, it disaggregates revenue similar to its segment reporting.

The Group determines that the categories used in the investor presentations and financial reports used by the Group's management can be used to meet the objective of the disaggregation disclosure requirement of PFRS 15, which is to disaggregate revenue from contracts with customers and other counterparties into categories that depict how the nature, amount, timing and uncertainty of revenue and cash flows are affected by economic factors.

As a result of the sale of a portion of the Group's interest in GMCAC, the airport operations and trading operations were derecognized from the Group's consolidated statements of income.

A summary of additional disaggregation from the segment revenues are shown below.

The Group is exposed to this risk for various financial instruments, such as the granting of loans and receivables to customers and related parties and placing deposits with local banks and investment in bonds and unit investment trust fund.

The Group continuously monitors defaults of customers and other counterparties, identified either individually or by group, and incorporate this information into its credit risk controls. The Group's policy is to deal only with creditworthy counterparties.

The maximum credit risk exposure of financial assets and contract assets is the carrying amount of the related assets as shown in the interim condensed consolidated statements of financial position or in the detailed analysis provided in the selected explanatory notes to the interim condensed consolidated financial statements, as summarized below.

None of the Group's financial assets are secured by collateral or other credit enhancements, except for cash and cash equivalents and trade and other receivables as described below and in the succeeding page.

(a) Cash and Cash Equivalents

The credit risk for cash and cash equivalents is considered negligible, since the counterparties are reputable banks with high quality external credit ratings. Included in the cash and cash equivalents are cash in banks and short-term placements which are insured by the Philippine Deposit Insurance Corporation up to a maximum coverage of P0.5 million for every depositor per banking institution.

(b) Trade and Other Receivables and Contract Asset

The Group applies the PFRS 9 simplified approach in measuring ECL which uses a lifetime expected loss allowance for all trade receivables and other receivables and contract assets.

To measure the ECL, trade and other receivables and contract assets have been grouped based on shared credit risk characteristics and the days past due (age buckets). The Group also concluded that the expected loss rates for trade receivables are a reasonable approximation of the loss rates for the other receivables as it shares the same credit risk characteristics.

The expected loss rates are based on the payment and aging profiles over a period of 36 months before June 30, 2023 or December 31, 2022, respectively, and the corresponding historical credit losses experienced within such period. The historical loss rates are adjusted to reflect current and forward-looking information on macroeconomic factors affecting the ability of the customers to settle the receivables. The Group has identified the inflation rate in the Philippines to be the most relevant factor, and accordingly adjusts the historical loss rates based on expected changes in this factor.

The Group has identified the inflation rate in the Philippines to be the most relevant factor, and accordingly adjusts the historical loss rates based on expected changes in this factor.

The Group identifies a default when the receivables become credit impaired or when the customer has not been able to settle the receivables when due, depending on the terms with customers or after completion and acceptance of the stage of completion as represented by the billings. In making the assessment, the Group considers the net position of the customer after advances and deposits received from the customer, reason for non-payment (i.e., dispute related to quality of work completed has been raised by the customer) and the credit standing of the customer. In addition, the Group considers qualitative assessment in determining default such as in instances where the customer is unlikely to pay its obligations and is deemed to be in significant financial difficulty. When customer is unlikely to pay a past due account in the next year due to financial difficulty, an ECL is recognized in the books. The Group has determined that the credit standing and liquidity of the significant portion of its receivables and customers from the construction segment are not affected severely by COVID-19 as these customers have reputable cash management strategies.

On that basis, the loss allowance as at June 30, 2023 and December 31, 2022 was determined based on months past due.

For contract assets, the Group has recognized an allowance for ECL amounting to P288.2 million representing unbilled costs incurred by the Group and assessed to be not recoverable. No additional impairment losses on contract assets have been recognized in 2023.

(c) Refundable Security and Bond Deposits

The Group is not exposed to any significant credit risk exposures to its lessors as lease agreements were executed with reputable entities. The Group can negotiate, before the end of the lease term, to apply deposit to rentals due.

26.3 Liquidity Risk

The Group manages its liquidity needs by carefully monitoring cash outflows due in day-to-day business. Liquidity needs are monitored in various time bands, on a day-to-day and week-to-week basis, as well as on the basis of a rolling 30-day projection. Long-term liquidity needs for six-month and one-year periods are identified monthly.

The Group maintains cash to meet its liquidity requirements for up to 60-day periods. Excess cash is invested in time deposits or short-term placements. Funding for long-term liquidity needs is additionally secured by an adequate amount of committed credit facilities and the ability to sell long-term financial assets.

27.2 Offsetting of Financial Assets and Financial Liabilities

The Group has not set-off financial instruments in 2023 and 2022 and does not have relevant offsetting arrangements except as disclosed in Notes 21.4 and 26.2(b). Currently, all other financial assets and financial liabilities are settled on a gross basis; however, each party to the financial instrument (particularly related parties) will have the option to settle all such amounts on a net basis in the event of default of the other party through approval by both parties' BOD and stockholders. As such, the Group's outstanding receivables from and payables to the same related parties as presented in Note 21 can be potentially offset to the extent of their corresponding outstanding balances.

27.3 Fair Value Hierarchy

In accordance with PFRS 13, *Fair Value Measurement*, the fair value of financial assets and financial liabilities and non-financial assets which are measured at fair value on a recurring or non-recurring basis and those assets and liabilities not measured at fair value but for which fair value is disclosed in accordance with other relevant PFRS, are categorized into three levels based on the significance of inputs used to measure the fair value. The fair value hierarchy has the following levels:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities that an entity can access at the measurement date;
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and,

- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The level within which the asset or liability is classified is determined based on the lowest level of significant input to the fair value measurement.

For purposes of determining the market value at Level 1, a market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis.

For investments which do not have quoted market price, the fair value is determined by using generally acceptable pricing models and valuation techniques or by reference to the current market value of another instrument which is substantially the same after taking into account the related credit risk of counterparties, or is calculated based on the expected cash flows of the underlying net asset base of the instrument.

When the Group uses valuation technique, it maximizes the use of observable market data where it is available and rely as little as possible on entity specific estimates. If all significant inputs required to determine the fair value of an instrument are observable, the instrument is included in Level 2. Otherwise, it is included in Level 3.

27.4 Financial Instruments Measured at Fair Value

Since the fair value of the Group's financial assets through FVOCI approximates the cost amounting to P3.5 million as of June 30, 2023 and December 31, 2022, the fair value change is deemed immaterial. The Group's financial assets through FVOCI are under Level 2 and 3 of the fair value hierarchy.

The table below shows the fair value hierarchy of the Group's classes of financial assets and financial liabilities measured at fair value in the statements of financial position on a recurring basis as of June 30, 2023 and December 31, 2022.

There were neither transfers between Levels 1 and 2 nor changes in Level 3 instruments in both periods.

Described below is the information about how the fair values of the Group's classes of financial assets are determined.

(a) *Equity Securities*

As of June 30, 2023 and December 31, 2022, instrument included in Level 2 comprise equity securities classified as financial assets at FVOCI. These securities were valued based on their fair market values by reference on published share prices of golf club shares and as at June 30, 2023 and December 31, 2022, respectively. These are included in Level 2 as their prices are not derived from market considered as active due to lack of trading activities among market participants at the end or close to the end of the reporting period.

The Group has equity interest of 1% in SSPI as of June 30, 2023 and December 31, 2022. These securities were valued based on entity specific estimate; thus, included in Level 3.

27.5 Financial Instruments Measured at Amortized Cost

The table below and in the succeeding page summarizes the fair value hierarchy of the Group's financial assets and financial liabilities which are not measured at fair value in the interim condensed consolidated statements of financial position but for which fair value is disclosed. Short-term commercial papers are included since these financial instruments are measured at amortized cost, which approximate their fair values upon designation as financial assets at FVTPL (see Note 27.4).

27.6 *Fair Value Measurement for Investment Property Carried at Cost*

The fair value of the Company's investment properties amounting to P4,119.3 million and P4,521.2 million as of June 30, 2022 and December 31, 2022, respectively, is categorized as Level 3, which represents the actual cost incurred to date on arm's length basis

In estimating the fair value of investment property, management takes into account the market participant's ability to generate economic benefits by using the assets in their highest and best use. Based on management assessment, the best use of the Company's non-financial assets indicated above is their current use. In 2020, the Company determined that the fair value of the building approximates its carrying amount as of December 31, 2020 as it was only newly constructed in March 2019. In 2022, the Level 3 fair value of commercial area under investment properties was determined using the income approach which utilized discounted cash flow method to convert future cash flows to be generated by the non-financial assets in reference to the value of expected income, net of cost of services, other operating expenses and income taxes. The significant unobservable inputs used in the valuation of the property were future annual free cash flows ranging from P520.0 million to P2,400.0 million for an average period of 29 years. The discount rates applied in determining the present value of future annual free cash flows is 12%. The management has determined that a reasonably possible change in the unobservable inputs to different amounts or rates would not cause the fair values of the non-financial assets to increase or decrease significantly.

There has been no other change to the valuation techniques used by the Company for its non-financial assets. Also, there were no transfers into or out of Level 3 fair value hierarchy in 2022 and 2021.

29. CAPITAL MANAGEMENT OBJECTIVES, POLICIES AND PROCEDURES

The Group's capital management objectives are to ensure the Group's ability to continue as a going concern and to provide an adequate return to shareholders by pricing services commensurate with the level of risk.

The Group monitors capital on the basis of the carrying amount of equity as presented on the face of the interim condensed consolidated statements of financial position.

The Group sets the amount of capital in proportion to its overall financing structure, equity and liabilities. The Group manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, issue new shares, re-issuance of treasury shares or sell assets to reduce debt.

Results of the Performance of Agreed-Upon Procedures

2. With respect to item 2, we noted that the total amount of disbursements appearing in the Report agrees with the amount in the detailed schedule of disbursements of the Offering Proceeds.

3. With respect to item 3, we found the disbursements of proceeds in the Report as of and for the quarter ended June 30, 2023 is consistent with the planned application of proceeds indicated in the Use of Proceeds section of the Offering Prospectus and its subsequent revision of allocation as approved by the Company's Board of Directors (BOD) on February 26, 2021 and disclosed in the Philippine Stock Exchange Electronic Disclosure Generation Technology on March 1, 2021.

4. With respect to item 4, we noted the following:

   a.) The details of the disbursements incurred from April 1 to June 30, 2023 showed that the Company used the Offering Proceeds for the following purposes:

      - ***MCIA Multi-Use Development***

        MCIA, the gateway to the Visayas and Southern Philippines, is the second largest airport facility in the country with a consistently growing number of passengers annually.

Under the existing Concession Agreement (CA1), GMR-Megawide Cebu Airport Corporation (GMCAC) shall deliver a 2nd terminal and rehabilitate the existing terminal, which the company completed in July 2018 and September 2019, respectively, to reduce congestion as well as meet the growing passenger traffic into Cebu. The Capacity Augmentation, which is part of CA1 designed to further expand the airport's capacity, remains in the balance. GMCAC is undertaking this capital extensive project to provide a world-class terminal airport with a welcoming ambiance that is distinctly Filipino.

The MCIA mixed-use development project is envisioned to further accelerate the airport's value creation. The initial plans involve the construction of a 400-room hotel, a Meetings, Incentives, Conference, Exhibitions (MICE) facility, and a travel retail concept to complement the airport's features. Estimated cost of the MCIA mixed use development project is P3,000,000,000.

While the Cebu hotel industry may have been affected by the Corona Virus Disease 2019 (COVID-19) pandemic, long-term prospects remain sound given Cebu's ideal location as both a tourism and business hub. In addition, the project development timetable of 2-3 years provides enough time for the situation to revert back to pre-COVID environment.

The project has completed the final design and concept stages but is currently on push-button mode and will be re-evaluated on when initial development will commence, subject to resumption of normalcy of travel and airport operations and the project's overall value creation to all its stakeholders.

P331.6 million from the Offering Proceeds were allocated for this project, P77.9 million of which were released as of June 30, 2023. In December 2022, the Company disposed a portion of its interest in GMCAC which was reduced from 60.00% to 33.33% as of December 31, 2022. In relation to this, management intends to reallocate the remaining balance of the proceeds to another project. There were no disbursements related to this project for the quarter ended June 30, 2023.

- ***Development of Lot 2 of the PITX and Other Locations***

  The PITX is a flagship project under the government's Build, Build, Build infrastructure program, dubbed as the Philippines "first landport". PITX is a 4.5 hectare development and currently Lot 1 (2.7 hectares) houses the transport terminal, commercial spaces, and office buildings under one roof. PITX is effectively 100% owned by the Company.

  With a rated capacity of 100,000 passengers daily, PITX offers seamless connections to and from the southwest portion of Metro Manila, via multiple modes of transportation, from provincial to incity buses, taxis, jeepneys and UV Express shuttles.

  The development of Lot 2 (1.8 hectares) will further improve terminal operations by providing a staging area for buses. It will also offer additional employment and business opportunities through the construction of office towers and retail establishments inside the facility.

The original plan is to develop a similar structure to the existing terminal, to be comprised of four levels, with commercial leasing assets occupying the floors above the bus staging area. Estimated cost for the PITX Lot 2 development project is around P5,000,000,000.00.

The project is currently undergoing design revision and reconceptualization and is being modified to serve its best use under the new operating environment. In addition, developments over the last six (6) months in this space has been very fluid and encouraging.

The Company has identified several areas as potential landport locations, with advanced discussions already taking place, to scale up its existing transport-oriented development (TOD) portfolio, like PITX. The Company expects to make more concrete headway and visibility with other projects in this segment within the next 6-12 months that will require initial funding.

P994.7 million from the Offering Proceeds were allocated to this project. As of and for the quarter ended June 30, 2023, there were no disbursement made yet related to this project.

- ***Expansion of Pre-Cast and Other Ancillary Business Units***

The Company is anticipating an increased demand for pre-fabricated construction materials under the new normal, both for its traditional market (i.e. residential, office, and commercial / industrial) and new segments (horizontal infrastructure) it plans to expand and enter into. With the new occupational health and safety protocols arising from the COVID-19 pandemic, the Company believes that the pre-cast technology will be well-suited for the industry, given its less human labor requirement and faster turn-around compared with the traditional method.

Moreover, the government's roll out of major infrastructure projects enabled the Company to identify opportunities in this segment, which will be the driving force to Megawide's infrastructure pivot. In addition to the Company's engineering, procurement and construction (EPC) business, these projects will likewise require huge support from other ancillary services (batching plant, formworks, specialized equipment, transport, and others), being a vertically integrated construction company.

In relation to this, the Company has finalized its plan to expand its pre-cast plant capacity to approximately 40,000 cu/m/month, from the current 13,000 cu/m/month, in various high growth locations across the country, including the existing plant in Taytay, Rizal. Estimated cost of the project is around P1,000,000,000.00 for full capacity and has reached around 25% completion as of end-2019. The targeted capacity of 35,000-40,000 cu/m/month is originally projected to be achieved by the end of 2024-25, subject to market conditions and operating environment.

Furthermore, the expansion of its construction services and ancillary businesses require additional funding and the Company expects the progress of these initiatives to accelerate as soon as new infrastructure contracts are secured within the year.

P576.8 million from the Offering Proceeds were allocated to this project, P284.6 million of which were released as of June 30, 2023. Disbursements for the quarter then ended amounted to P4.6 million.

- ***NAIA Rehabilitation***

The government's airport modernization and expansion program opened up exciting opportunities for the private sector to contribute to the country's infrastructure development program. Being the largest private sector airport operator, by virtue of its concession agreement with the Philippines' second busiest airport, the Company is well positioned and has a unique advantage to participate in other airport development projects in the government's pipeline.

In a letter dated 15 July 2020, the Manila International Airport Authority (MIAA) granted the consortium led by the Company with GMR Infrastructure Limited as partner operator, the Original Proponent Status (OPS) for the development of the NAIA. Under the Build-Operate-Transfer (BOT) Law, the holder of the OPS will have the right to match any competing offer from another proponent under the Swiss Challenge scenario, subject to the terms and conditions of the Swiss Challenge process.

The project proposal plans for a phased redevelopment of existing NAIA terminals to remove decongestion and increase annual total passenger-handling capacity from the existing 30 million passengers to 65 million. The deliverables also include expanding and interconnecting the existing terminals of NAIA using a People Mover System (PMS), upgrading airside facilities, developing commercial facilities to increase airline and airport efficiencies, enhancing passenger comfort and experience and elevating the status of NAIA as the country's premier international gateway.

The Company received communication from the MIAA last 15 December 2020 stating that consortium's OPS has been revoked, with no formal notice on the reasons for the revocation. Megawide has submitted a motion for reconsideration for its proposal last 21 December 2020, as it has, at all stages, complied with the all the government's requirements for its unsolicited proposal. The BOD of MIAA denied the motion for reconsideration of Megawide, which sought to overturn the revocation of the Megawide's OPS for the rehabilitation of the NAIA. Megawide was formally informed of the said denial through a letter from the Corporate Secretary of the MIAA BOD dated January 25, 2021.

The proceeds initially allocated for the said project has been reallocated to other projects as approved by the Company's BOD on February 26, 2021 and disclosed in the PSE Edge on March 1, 2021.

- ***Expansion of MCIA Under Concession Agreement 2***

  The Company has an existing CA2 proposal, which has an OPS status, which will extend its existing Concession Agreement in MCIA by another 25 years. Phase 1 involves the takeover of the airside facility, rehabilitation of the existing runway and taxiways, construction of an additional full-length parallel taxiway, development of additional rapid exit taxiways and runway holding positions. Phase 2 involves the construction of a second parallel and independent instrument runway and Phase 3 comprises the construction of Terminal 3.

  Given the recent developments, the Company is currently in active discussion with the government and updating its proposal and revisiting the terms of the OPS based on the new operating landscape and requirements of the project. Under the BOT Law, the holder of the OPS will have the right to match any competing offer from another proponent under the Swiss Challenge scenario, subject to the terms and conditions of the Swiss Challenge process.

  The Company continues to hold the OPS for the expansion of MCIA under CA2, which is currently being discussed with and evaluated by the Government. No amount has been reallocated to the project but the scope has been expanded to cover developments and activities required under CA1, in compliance with its terms and conditions, which will entail financial support.

  P816.1 million from the Offering Proceeds were allocated and were fully used for this purpose as of June 30, 2023.

- ***Development of the Cebu Integrated Transport Hub***

  The Company executed an Agreement with the Local Government of Cebu last January 12, 2021 for a 50-year concession agreement to redevelop and operate the Carbon Market. The project requires pre-development and logistical expenses in line with its 5-year development timetable.

  The proposal involves the transformation of the existing Carbon Market into a mixed-use development anchored on a modern public market and an integrated multi-modal transport hub. Phase 1 of the project involves the rehabilitation of the existing public market, including a new wholesale market, construction of a new night market, and other lifestyle commercial establishments, land transport and ferry terminals, among others. Phase 2 includes a mixed-use development plan (hotel, MICE, retail, etc.) envisioned to transform the property into one of Cebu's primary attractions.

  P1,274.7 million from the Offering Proceeds were allocated and were fully used for this purpose as of June 30, 2023.

- ***General Corporate Purposes***

  General corporate purposes include: (1) purchase or lease or repair of construction equipment; (2) provision for potential projects and business opportunities; and, (3) working capital.

P331.6 million from the Offering Proceeds were allocated and were fully used for this purpose as of June 30, 2023.

b.) The remaining balance of the Offering Proceeds amounting to P1,540.6 million as of June 30, 2023 is expected to be applied on costs to be incurred in accordance with the planned use and estimated timing as disclosed in the Offering Prospectus and to the PSE and its subsequent revision of allocation.

5. We found no exceptions with respect to item 5.

Because the foregoing procedures do not constitute either an audit or review made in accordance with Philippine Standards on Auditing (PSA) or Philippine Standard on Review Engagements (PSRE), respectively, we do not express an assurance on the use of Offering Proceeds based on the said standards. Had we performed additional procedures, or had we performed an audit or review of the financial statements in accordance with PSA or PSRE, respectively, other matters might have come to our attention that would have been reported to you.

We have no responsibility to update this report for events or circumstances occurring after the date of this report.

Our report is solely for the purpose set forth in the first paragraph of this report and for your information and is not to be used for any other purpose or to be distributed to any other parties. This report relates only to the information and items specified above and does not extend to any financial statements of the Company, taken as a whole.
